## Medical Report

Dear Distributor,

A Medical report which was written as a conclusion after the UEGW congress in Amsterdam in October is now available. The report consists of three parts:

-High infection rates in the Population, based on an interview with Prof Mathias Strowski

-<sup>13</sup>C-Breath tests for assessment of gastrointestinal disorders and liver function, based on an interview with Dr Oliver Götze

-The Diagnosis of *Helicobacter pylori* – what is the current status?, interview with Prof Mathias Strowski

Please use this official report (ISSN 1614-9041) to emphasize the importance of diagnosing *Helicobacter pylori* and also the ease of use of Urea Breath Test and breath tests in general.

There will be a link on our web to a readable version of the report.  
(<http://www.kibion.com/index.php/news/122-medical-report>).

You can also login to the Distributor site and go to Promotion material.  
(<http://www.kibion.com/index.php/login/promotion-material>)

We will also be able to provide you with paper copies of the report, please let us know how many you would need.

Best regards

KIBION
